

1

Stay Connected with Daisy

2

Remote Access

The stable connection will enable you and your team to upload and collaborate on documents, whether they're in the office, working from home, or elsewhere. Especially useful in the aftermath of the Covid-19 Lockdown, when many employees aren't yet back in the office.

3

Speed Promise

If we have informed you of a certain speed and availability within the area, we guarantee that you'll receive those results, thanks to our robust SLAs across many of our servers.

6

Cyber Security

Many of our packages come equipped with DDoS protection, cybernet security, and file backups into the cloud, allowing you to breathe easy knowing your data is safe out of harm's way.

5

Reliable Support

Having a stable connection wherever you go means that information can be relayed between the office and the workers off-site in real time, without any need to panic about upcoming deadlines or not having an answer for a customer.

4

Reliable Connectivity

Having a stable connection wherever you go means that information can be relayed between the office and the workers off-site in real time, without any need to panic about upcoming deadlines or not having an answer for a customer.
