

# Digital Inclusion with Daisy Communications

daisy.

COMMUNICATIONS

Since the pandemic, the digital divide has exponentially grown in the UK. "The coronavirus lockdown risks turning the problem of digital exclusion into a catastrophe of lost education and opportunity for the UK's poorest and most vulnerable," say University of Cambridge researchers Hannah Holmes and Dr Gemma Burgess.

Tenants are coming to Housing Associations for support long after moving in. Their questions aren't always about bricks and mortar, they can be about welfare, community inclusion, education and culture.

Digital inclusion and giving these people the resources and time they need to get online so they can pay their rent, report with repairs, connect with friends, apply for jobs, is essential.

At Daisy Communications we're here to help you, help your tenants, by ensuring they have access to broadband, a functioning telephone system, and hardware like laptops, mobile phones or tablets. Check out our product list:

# Our Products

## Daisy Anywhere

[Daisy Anywhere](#) enables you to connect from, well, anywhere. Not bound to a single network, your data connection will be more reliable than ever before.

Utilising the UK's leading three networks, Daisy Anywhere's signal is completely unsteered, meaning your residents will have access to the best signal in their area.

Your tenants could be in the middle of a city or out in the rural countryside, and Daisy Anywhere would still offer them a reliable internet connection for their devices.

## FTTP

[Fibre to the Premise \(FTTP\)](#) or Ultrafast Broadband, is a broadband option available to you, offering package deals for either 150Mbps or 300Mbps download bandwidth speeds, and with flexible contract lengths.

FTTP with Daisy Communications will come with unlimited data usage and free DDoS security, giving your tenants peace of mind in the security they have.

Without any copper cables, there is drastically reduced risk of degradation and environmental issues, offering you a solution that's built to carry your tenants into the future.

We enjoy a strong working relationship and have been impressed with the high level of account management that has been maintained throughout. Response is fast, prices represent good value and have allowed us to realise significant savings, and customer service is exemplary. They are never intrusive and have struck a great balance between giving us what we need, and advising us on new service offerings. Would not hesitate to recommend.

# Our Products

## Chromebooks

Using a fresh new operating system, the [Chromebook](#) and Chrome OS has quickly become a powerhouse in the market. One of the key features is that much of the system is cloud based, with little to no usage of a hard drive – the hardware only being used for interface.

Coming equipped with plenty of applications to help you with office-based work, and with only mandatory hardware costs, the Chromebook is a steal at such a low cost.

## Mobile Phones

Being the largest independent mobile provider in the UK, Daisy Communications can offer a wide array of mobile options to you, your agency, and even to the residents of your housing.

With [offers](#) for just handsets, or for fully contracted tariffs, we have you covered. Our range of smartphones include the latest in Samsung Galaxy and iPhone options, alongside tablets and other of the UK's leading mobile brands. These offers come with different storage volumes, contract options, and tariff durations.

As well as providing excellent value for money, the service provided by the team has been of a consistently high standard.
